

Whereabouts of key personnel and priced items at your fingertips

Hexamite has created a briefcase, containing a fully functional HabiTag demo system.

Using this kit: a trained representative can in a matter of seconds; set up a fully functional HabiTag system, covering up to four rooms. Software is included that will: through any available internet gateway; upload the location of the tag carriers, to an internet website. The whereabouts of the demo tags; become available to spectator's smart-phones, during the demonstration.

The briefcase demo contains two wearable HabiTags. These can be strapped on a wrist; or, hung on a clip strap, which can be securely attached to any piece of clothing. Two wrist bands, and two clip ribbons for clothing can be found in the briefcase. It also provides two HabiTags suitable for object tracking.

Four "room receivers" are supplied with the demo unit. These can be plugged into a standard EU 240Vac socket, and adjusted to the most favorable reception angle. A PC interface is included, this interface plugs into a standard USB port. Demo drivers and software, can be downloaded from hexamite.com website, or made available on a CD. This software, reads the RF (broadcasted data from the receivers) through the USB port.
